

THE FIRE MARK

BONITA SPRINGS FIRE CONTROL AND RESCUE DISTRICT

JUNE 2017

MOTOR VEHICLE CRASHES

At the June 5th Commissioners Meeting, Fire Chief Daigle highlighted six recent Motor Vehicle Crash responses and the type of training involved in preparing for them. The Fire Chief explained that after a crash, vehicle extrication is often necessary before rendering emergency medical care. After first responders secure the accident scene, technical stabilization of the vehicle is engineered by the Lieutenants, and extrication can begin. Vehicle extrication is the process of removing a vehicle from around its occupants after a crash when it is impossible or inadvisable for the occupants to exit otherwise. Chief Daigle noted that the District is able to train for motor vehicle crashes at its Training Facility at Station Four with donated vehicles.
